Blossom

Blossom is a young plant that can't wait to be big. In the English garden in which she grows up, all the flowers have already bloomed. The rose bushes laugh at her, the forget-me-nots pretend she doesn't exist and the pansies tease her. What a small, insane thing she is.

But Blossom does not give up: she waters herself, wraps herself with leaves from other plants and goes in search of better soil. She begs the sun "Let me shine!" But nothing happens at all.

When the moon is high in the sky, Blossom cries. Until she feels something she has never felt before.

Within the Heart of Wicked Creatures

Primal monsters, vengeful spirits, blood children. All of them arrive during the blood moon. All of them pose a threat to humanity.

Priya Chkadhari has a secret: she is a blood child, born during the blood moon, with special powers. Priya lives as inconspicuously as possible so as not to get detected, because blood children are seen as monsters that have to be put down. It's stifling, but she cannot seem to be able to escape her fate.

When Priya one day gets the chance to study at Kuwatta - the largest military fort of the land - she jumps at it. A placement at Kuwatta would mean a new life for Priya. A potential future.

To her bafflement, at Kuwatta her powers are seen as a gift rather than a curse. She meets other blood children, all of them with their own powers, and she's trained to fight in the guerilla war against the colonizers that have been holding onto Awaran for centuries. It all seems too good to be true. And it is, because she discovers a great danger that lies within the cursed heart of Kuwatta itself...
